

MANAGEMENT DECLARATION

As an application developer, developer and manufacturer of mobile communication solutions, we have been a prominent player in the domestic and foreign IoT/M2M sector for several years. Our products and services are increasingly known and recognized not only in Hungary but also abroad.

The key to our success is the trust our customers and business partners have placed in us, which we are building ever more consciously. Our mission drives us to move with the times and to prioritise information security, quality and environmental awareness, health and safety, energy efficiency and security at work, and the prevention of corruption risks.

Transparency, ethical business conduct and integrity are our core values that underpin all our decisions and actions. In our work, we firmly reject and prohibit all forms of corruption, whether it be kickbacks, bribes, extortion, facilitation payments, abuse of power for personal gain, or undue advantages and gifts provided with the intention of influencing. We do not condone and will vigorously oppose efforts to engage in fraud, cartels and other antitrust or anti-competitive violations or money laundering. We expect these standards from all our employees and business partners. We require all our colleagues and business partners to conduct their business practices in accordance with these principles.

As the owners of Intelliport Solutions Ltd. and Intelliport Systems Ltd., we are committed to professional development, social responsibility, transparent business operations and innovative solutions, as well as to the full application and compliance with anti-corruption regulations, in particular ISO 37001. By adopting this standard, we aim not only to effectively manage corruption risks, but also to demonstrate our organisation's commitment to clean and responsible business conduct.

We believe that a values-based approach and a commitment to anti-corruption is what makes our organisation truly successful. It is how we can best serve our business partners and contribute to a fairer, more transparent and more liveable business environment.

OUR PRIORITIES:

Fighting corruption: we systematically identify, assess and manage potential corruption risks, ensuring that your business processes are transparent and controllable.

Strengthening our culture of integrity: through regular training, internal communication and exemplary leadership, we ensure that all our employees and business partners understand and adopt our integrated management policies.

Whistleblowing mechanisms: we operate a system that allows for the confidential reporting of breaches, irregularities or unethical behaviour, ensuring the support and protection of whistleblowers.

Continuous improvement: we regularly review and improve our management systems in line with current legislation, business needs and international requirements.

We believe that to be successful in business in the long term, we need to continuously improve our business processes and be at the forefront of modern organisational development tools. Through personal example and committed leadership, we encourage our employees and partners to embrace value-based operations.
